

**Personal Laptops at Creekside Elementary  
2017-2018**

Dear Families of Third - Fifth Grade Students,

We would like to accommodate requests for students to be able to bring their personal computers and/or tablets to school. This is entirely optional, and is an important decision to think over based on your child's responsibility level and risk involved with bringing expensive equipment to school. Please remember if students bring their laptops and/or tablets to school, they do so at their own risk. Creekside Elementary and the Cherry Creek School District are not responsible for lost, stolen, or broken personal computers and/or tablets. We recommend bringing a padded carrying case and marking the computer with your child's name. We will, of course, continue to provide time for students to use the technology available at school.

Students will be allowed to work on their computers at certain times of the day. This may include times when the class is working on written assignments, doing research, or when they use school-owned laptops.

At Creekside, we are always looking for ways to prepare our students for the future. We are not sure, however, that all elementary school students are ready to bring their own computer devices to school. Please take the time to think this over carefully before making a decision.

Sincerely,

Kelly Sommerfeld  
Principal  
Creekside Elementary
